

Date : 3rd December
Time : 8.00 a.m. - 8.50 a.m.
Venue : Committee Room 'A'/BMICH

MICROFOSSILS IN ANCIENT ROCKS AND IN
METEORITES

by Prof. Hans Pflug
Geologisch-Palaontologisches
Institute
Der Justus-Liebig-Universitat
West Germany

The new technique of statical demineralization allows the study of rock sections under high magnification. Rich assemblages of microstructures of apparently biological origin have been detected in Precambrian sediments and carbonaceous meteorites by this method.
